Waste Company Directory Wall Chart

On average 6 tonnes of waste is produced for each house built, or for every 12 houses built, one house is thrown away! The Ashford Construction Project provides advice on how your company can reduce the amount of waste sent to landfill.

Listed below are details of waste management companies active in the South East. The dots represent the type of waste each company will collect.

Companies who have benefited from the Ashford Construction Project

Anthony Ball, Ball Contractors:

We benefited from the great communication and resources provided by the Ashford Construction Project. Thanks to its support, we were able to collate all our waste information and produce accurate Site Waste Management Reports. This led to Ball Contractors becoming a partner in the Bulky Waste Project. We look forward to a bright future when we work within the Ashford Construction Project again.

Jo Richards, Marketing & Corporate Manager, Hillreed Homes:

We have been working in the Ashford Construction Project for sometime now and have found the insight into the area of Site Waste Management invaluable. It highlighted the SMARTwaste programme as well as provided direct support for our site managers and sub-contractors, helping them understand waste reduction and the importance of best practice.

David Mann, Construction Manager, Epps Construction:

When site waste management plans came into force, we were bombarded with numerous confusing and overly complicated formats. Ashford Construction Project introduced us to the SMARTwaste programme that helps log the data on site waste. The project helped sharpen our minds to the value of waste, more so than without this support. We are now implementing practical plans on half a dozen projects across Kent.

What is the Ashford Construction Project?

Ashford's Future has commissioned Remade South East to deliver the Ashford Construction Project to provide advice and expertise on Site Waste Management Plans and other aspects of sustainable construction to construction sites in Ashford. The aim is to support delivery of sustainable growth in the town.

The Ashford Construction Project provides companies with:

- FREE Practical help with Site Waste Management Plans including creation, monitoring and data collection
- FREE Tool-box talks and Site Waste Management Plans training sessions
- FREE Procurement assistance to minimise waste and increase recycled-content materials

For more information about the project and how to get involved please visit www.remade-southeast.co.uk/ashford

The website has further details on Site Waste Management Plans, the SMARTwaste programme, case studies of companies involved in the project, information on sustainably sourced and energy efficient construction products and waste related legislation.

Funded by Ashford's Future

Ashford has is now the fastest growing town between London and the Continent, and is set to double in size by 2031, creating 28,000 extra jobs and 31,000 new homes.

The Ashford's Future Company is responsible for delivering regeneration and key infrastructure and development projects throughout the borough and ensuring the town develops and grows in a sustainable way.

For more information about Ashford's Future visit www.ashfordbestplaced.co.uk

Delivered by Remade South East

Remade South East is a not-for-profit company which aims to expand upon the successful waste market development activities carried out across the whole of the South East of England.

The Programme creates and sustains new markets for waste resources in order to reduce the amount of waste going to landfill and to minimise CO2 emissions through the re-use and recycling of materials.
