

Practical Affordable Carbon Reduction Support for NHS and Private Health Services Providers

**Confused by carbon reduction plans?
Needing savings from resource efficiencies?
Looking to reduce waste and recycle more?**

Remade South East can offer your organisation help and advice on:

- **CO₂ benchmarking** – measure and reduce the amount of greenhouse gases your organisation generates
- **Waste auditing and benchmarking** – measure and reduce the amount of rubbish your organisation produces
- **Cost savings from resource efficiency** (diverting waste away from landfill)
- **Sustainable purchasing** – select and buy ‘greener’ products
- **Staff training**
- **Compliance with environmental legislation**

Remade worked with the South East Coast Ambulance Service to identify potential cost savings of over £9,000 per annum across all sites.

Now is the time to act!

Prime Minister David Cameron has reaffirmed his commitment to reduce the UK's carbon emissions under the Climate Change Act 2008:

"Further efficiencies can, and need to, be made from improving energy efficiency and developing more sustainable forms of delivery across the NHS, for example through working...on carbon reduction programmes that reduce energy consumption and expenditure."

About Remade

Remade South East is a specialist in identifying cost savings by improving waste management and recycling and by reducing CO₂ impacts.

Remade helps the Health Sector by providing a bespoke service tailored to meet each organisation's specific needs. Follow-up support is provided to ensure that NHS waste and carbon targets are met.

"Remade South East's impressive track record is well deserved. Within six weeks, we moved the "Recycle zone" project from idea to launch saving Frimley Park Hospital over £6,000 per year."

Gillian Brown, Environment Manager, Frimley Park Hospital NHS Foundation Trust.

Contact Diana Lock, Chief Executive of Remade, for more information and to discuss your carbon reduction and resource efficiencies plans.
